I found the book. The Amateur Radio Handbook 10th edition.
Just received it to day. Thank all of you for your suggestions. Without
your help I would not have been able to track my book down.

I checked this book out many times when I was 12 years old.
It has a 70 Watt output tx that is a bit unusual and could not possibly worked
as designed. It had a 6L6 crystal oscillator driving a 829B with the two halves
of the tube in push-push. Grids driven 180 degrees out of phase and plates
connected
together. The instructions are very clear, 80 meter crystal and coils for 80
meters, etc.
I can send picture of schematic if you are interested.

Bill wa4lav

Oh, would a class C push-push doubler be as efficient as a class C amplifier?
It could work with the output stage functioned as a doubler.

So far my search has not panned out.
Looks like it will be the 9th or 10th edition.
It had 2 receivers in it. One crystal and a second was regenerative.
3 power supplies, small one, with back to back 6.3VAC transformers ,used with the
regen receiver and a medium size one.
And 3 transmitters,
1 tube 6L6 oscillator
2 tube 2x 6L6
and a 70 Watt one using 1 6L6 and a 829B. CW or AM using screen grid modulation.
It 70W used two of the power supplies, the medium and the high power one.

CAUTION: External Sender

I know the book. Have you looked on line for it? A lot of these old books have been scanned. Try archive.org for starters. Google very often does not show these on line books. It seems to me that there was a series of these handbooks by Collins but may be confusing them with something much older.

Unusual for me, anyway. Can you post the schematic, Bill?

Message-ID: <009d01d64670\$bc74a1d0\$355de570\$@proc@sympatico.ca>

Hello Everyone,

The Royal Canadian Mounted Police schooner St. Roch was launched at North Vancouver in April 1928. She was designed as a supply vessel and floating detachment for the Arctic. She had a rounded hull which allowed her to winter in the ice in northern waters. On June 23, 1940 St. Roch sailed from Vancouver and navigated the Northwest Passage, arriving in Halifax on October 11, 1942. She was the second vessel after Roald Amundsen's Gjoa (1903) to traverse the Northwest Passage. However, she was the first vessel to traverse the Northwest passage from west to east.

Between July 22 and October 16, 1944 the St. Roch returned to Vancouver via a more northerly route through Lancaster Sound and Barrow Strait in only 86 days. In doing so she became the first vessel to traverse the Northwest Passage in both directions. She would make history one last time in 1954 after she travelled through the Panama Canal, making her the first vessel to completely circumnavigate the North American continent. Her seafaring days came to an end in 1954 and now she is the main attraction at the Vancouver Maritime Museum.

This announcement covers two areas for which there was little documentation. The first area deals with the radio room and the various pieces of radio gear that were fitted into the vessel over the years. The assistance I received from radio collector Tom Brent was most appreciated. This radio room document can be viewed at: [<http://jproc.ca/ve3fab/st_roch.html>](http://jproc.ca/ve3fab/st_roch.html)
http://jproc.ca/ve3fab/st_roch.html

The second part deals with the role that St. Roch played in Arctic radio communications during those early decades. This story can be found at:

[<http://jproc.ca/ve3fab/st_roch_wireless_and_the_st_roch.html>](http://jproc.ca/ve3fab/st_roch_wireless_and_the_st_roch.html)
http://jproc.ca/ve3fab/st_roch_wireless_and_the_st_roch.html

Regards,

Jerry Proc

Subject: [BoatAnchors] AB5S Kung Flu Update, 13 June

Message-ID: <a3ee1075-a79c-98d9-7589-9dcc124fba5b@ix.netcom.com>

Kung Flu Update

13 June.

First- my family is grateful for everyone's thoughts and prayers. They've been a great comfort.

May the good Lord remember your kindness.

I'm better and slowly recovering my strength.

Kay and Annabelle are still running fevers.

Amber is just beginning to cough.

Docs say to assume everyone in the house is now positive.

I would probably no longer be contagious, except for the fact that I'm in the house with
?three contagious people. I'm praying to God
?I won't have a relapse. One "mild" round of this
?is bad enough and they say the immunity is only good for 6 months. Oh joy.

"Mild" Hantavirus illness was worse, but it was
?confined to respiratory distress and I didn't
?have to worry about giving it to the family.

This monster attacks your whole body and can
"turn on a dime," going from what feels like a cold to life-threatening over night.

Multiple the "normal" flu. Then add terrible headaches, chills and tremors, lower backache so you can't sleep, and your sense of taste and smell disappears completely.

Low to moderate fever. My fever has been gone for
?a few days. Smell and Taste came back the day I left the hospital, but are now gone again. Probably from continual assault by the live virus still being shed from Kay and the babies.

The doctors are surprised that neither Kay nor I are in the hospital on a ventilator. I credit the prayers of loved ones and friends, plus our
?therapeutic regime of quinine (tonic water)/vita. C/ Zinc.

Half a cup of the diet tonic water, morning and evening without fail.

I recommend the diet because there's more sugar

?in regular tonic water than in Cola, and you
?really don't need that much sugar everyday.
I know that certain medical authorities have
?pooh-poohed the quinine, but as you've seen
?the situation is evolving all the time
and people are finding out what they believed
?one minute turns out to be false and vice versa.
?All I know is the results. I'm recovering,
Kay is still active but recovering,
and the doctors are scratching their heads-
they tell us very few families with our
health problems get away without being
ventilated. That's good enough for me.

Please say an extra prayer for Annabelle,
who is having the worst time, and Amber,
?who is just starting and we hope will
miss the worst of it.

Thank you again for your ongoing kindness.

GL ES 73 OM DE Dave AB5S
